

Are you ready for the next level in productivity and creativity? The Colorado M-series was designed to allow you to say 'yes' to more jobs, create stunning applications, and reduce turnaround times. It's modular architecture allows it to grow with your business, and is designed for low cost of ownership.

- The power of UVgel. Our unique UVgel technology creates robust, fade and scratch-resistant prints with excellent print quality.
- White ink without worry. Developed for the Colorado
 M-series, our UVgel ink set now brings you a next-level
 white ink that helps to reduce the hassles associated with
 white ink. The white ink option can be ordered with the
 printer or added as a hardware upgrade later by a trained
 service provider.
- FLXfinish+. A game-changer in large format graphics. Print
 matte, gloss, or mixed matte and gloss in one print, without
 varnish or an additional printhead. The FLXfinish+ option
 helps your production stand out from the competition.
- Impressive media range. More design freedom to impress your customers. Easily print textured, transparent, colored, reflective, and heat-sensitive media, plus many more! You can even upgrade the M-series to print on magnetic media with a hardware upgrade.
- Upgradeable. Is your business changing course or growing quickly? Easily add speed, FLXfinish+, dual-roll capabilities, and many other new functionalities to your Colorado M-series printer via a simple license.
- Rock-solid quality. The Colorado family is built for high uptime and consistent print output.
- Level up your Colorado into a Factory. Add a jumbo roll bulk feed system and matching finishing modules for high throughput and overnight jobs.
